

Economic Growth Region 9

Statistical Data Report for May 2013, Released July 2013

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in May. Twenty-five states had unemployment rate decreases, 17 states had increases, and eight states and the District of Columbia had no change, the U.S. Bureau of Labor Statistics reported. Forty-one states and the District of Columbia had unemployment rate decreases from a year earlier, four states had increases, and five states had no change. The national jobless rate was essentially unchanged from April at 7.6 percent but was 0.6 percentage point lower than in May 2012.

Nevada had the highest unemployment rate among the states in May, 9.5 percent. The next highest rates were in Illinois and Mississippi, 9.1 percent each. North Dakota again had the lowest jobless rate, 3.2 percent. In total, 21 states had jobless rates significantly lower than the U.S. figure of 7.6 percent, eight states and the District of Columbia had measurably higher rates, and 21 states had rates that were not appreciably different from that of the nation.

Economic Growth Region (EGR) 9

Bartholomew, Dearborn, Decatur, Franklin, Jackson, Jefferson, Jennings, Ohio, Ripley, and Switzerland Counties.

Unemployment Rates by State, May 2013 (seasonally adjusted)

U.S. - 7.6%
Illinois - 9.1%
Indiana - 8.3%
Kentucky - 8.1%
Michigan - 8.4%
Ohio - 7.0%

Columbus MSA Employment Trends

Labor force characteristics of persons with a disability in 2012

(Excerpted from The Editors Desk June 2013)

In 2012, the employment-population ratio of persons with a disability was 17.8 percent. In contrast, 63.9 percent of persons without a disability were employed. The employment-population ratio for persons with a disability was unchanged from 2011 to 2012, while the ratio for persons without a disability increased.

Characteristic	Persons with a disability	Persons with no disability
Total, 16 years and over	17.8	63.9
16 to 64 years	27	70.4
65 years and older	6.9	21.9
Men	21.4	69.7
Women	14.8	58.4
White	18.5	64.9
Black or African American	13.5	58.7
Asian	15.6	62.7
Hispanic or Latino ethnicity	16.2	63.1

For all age groups, the employment-population ratio was much lower for persons with a disability than for those with no disability. The lower ratio among persons with a disability is due, in part, to the fact that a large share of the population of persons with a disability was age 65 and older, and older persons are less likely to be employed. Among persons age 65 and over with a disability, the employment-population ratio rose to 6.9 percent in 2012, while the ratio for persons ages 16 to 64 with a disability held at 27.0 percent.

The unemployment rate for persons with a disability was 13.4 percent in 2012, higher than the rate for persons with no disability (7.9 percent).

In 2012, the unemployment rate for men with a disability (13.2 percent) was about the same as the rate for women (13.7 percent). As is the case among those without a disability, the unemployment rates in 2012 for those with a disability were higher among blacks (20.8 percent) and Hispanics (19.0 percent) than among whites (12.3 percent) and Asians (11.8 percent).

These data are from the Current Population Survey (CPS). To learn more, see "Persons With a Disability: Labor Force Characteristics — 2012" news release USDL-13-1141. The data on persons with a disability are collected as part of the CPS monthly sample survey of about 60,000 households that provides statistics on employment and unemployment in the United States. The employment-population ratio represents the proportion of the civilian noninstitutional population aged 16 years and over that is employed. Unemployed persons are those who did not have a job, were available for work, and were actively looking for a job in the 4 weeks preceding the survey. The unemployment rate is the number of unemployed persons as a percent of the civilian labor force (the employed plus the unemployed).
